

HTML GUIDE

Intro

Hello my name is fadhil iam currently a student and iam learning HTML from age 13

These are some basic HTML code which will be usefull and used more in websites

What Is Html

Hypertext Markup Language [HTML] is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and scripting languages such as JavaScript

HTML does'nt need any kind of compilers os interputers beacuse its simply run on a browser

just name you file as

```
filename.html
```

or give you file a extention of .html

Code

Template

```
<!DOCTYPE html>
<html>
  <head>
    <title>Title Of Website</title>
  </head>

  <body>

    </body>
</html>
```

Headings

```
<body>

  <h1>This Is A Heading</h1>
  <h2>This Is A Heading</h2>
  <h3>This Is A Heading</h3>
  <h4>This Is A Heading</h4>
  <h5>This Is A Heading</h5>
  <h6>This Is A Heading</h6>

</body>
```

Paragraphs

```
<body>

  <p>Your Paragraph Goes Here</p>

</body>
```

Button

```
<body>

  <button>My Button</button>

</body>
```

Links

```
<body>

  <a href="https://google.com/">Google</a>

</body>
```

Font

```
<body>

  <font size="12" color="red">
    <p>This is my red color text</p>
  </font>

</body>
```

Image

```
<body>

  

</body>
```

Video

```
<body>

  <video src="video-location.mp4"></video>

</body>
```
